Vibe Coding: Building & Deploying a Containerized AI Web App

Docker Containerization, AWS Elastic Beanstalk & HTTPS Report

LIVE AWS ELASTIC BEANSTALK DEPLOYMENT (DOCKER):

<http://studymate-ai-prod-env.eba-6yuyfhhu.ap-southeast-2.elasticbeanstalk.com>

LIVE SECURE HTTPS PUBLIC URL (DOCKER):

<https://studymate-ai-5z50.onrender.com>

Submitted for: Vibe Coding Masterclass Series

Organization: IBM & Bharat Cares

PART 1: PROJECT CONCEPT NOTE

Vibe Coding Masterclass | IBM & Bharat Cares

1. Project Title & Application Name

- Application Name: StudyMate.AI
- Project Title: Containerized AI Learning Assistant on AWS Elastic Beanstalk & HTTPS Cloud Platform

2. Problem Statement & Objective

Students and researchers face cognitive overload when synthesizing dense study material. StudyMate.AI simplifies notes into ELI5 summaries, answers real-time queries via an AI tutor, and auto-generates MCQ practice quizzes.

3. Target User & Use Cases

- High School & University Students preparing for exams.
- Researchers & Educators analyzing documents (.pdf, .docx, .txt).
- Self-Learners seeking interactive subject guidance.

4. LLM Model & API Integration

- LLM Engine: Google Gemini 3.6 Flash
- API Integration: @google/genai Node.js SDK via secure Express.js backend endpoints.

5. Docker Containerization & Live URLs

- Containerization: Built using multi-stage Dockerfile (Node.js 20-slim, Dockerrun.aws.json v1).
- AWS Elastic Beanstalk URL: <http://studymate-ai-prod-env.eba-6yuyfhhu.ap-southeast-2.elasticbeanstalk.com>
- Live Secure HTTPS Public URL: <https://studymate-ai-5z50.onrender.com>

PART 2: PROJECT DEVELOPMENT REPORT

Vibe Coding Methodology & AWS Docker Deployment

1. Tech Stack Overview

- Frontend: React 19, Vite, Tailwind CSS v4, Lucide Icons, Motion.
- Backend: Node.js 20, Express.js, Esbuild, Mammoth parser.
- AI Engine: Google Gemini 3.6 Flash (@google/genai SDK).
- Containerization: Multi-stage Dockerfile (Node.js 20-slim), Dockerrun.aws.json.
- Deployments: AWS Elastic Beanstalk & Render Cloud Platform.

2. Prompting Strategy & Frameworks

Persona Prompting

Configured AI with 'Expert Academic Exam Tutor' persona for clear, structured, encouraging responses.

JSON Schema Output

Enforced rigid JSON schema for Quiz Generation [{ id, question, options, correctIndex, explanation }].

3. Live Deployment URLs

AWS Elastic Beanstalk Docker URL

<http://studymate-ai-prod-env.eba-6yuyfhhhu.ap-southeast-2.elasticbeanstalk.com>

Secure HTTPS Public URL (SSL Encrypted)

<https://studymate-ai-5z50.onrender.com>

4. Reflections & Conclusion

Demonstrated end-to-end Vibe Coding methodology—architecting, containerizing with Docker, and deploying a functional AI web application on AWS Elastic Beanstalk and HTTPS Cloud infrastructure with zero cost and maximum security.
